CONCLUSIONS

My intention is to acquire work experience in the technology sector, to learn and implement solutions to the challenges that arise, to be able to grow professionally to achieve my objectives and thanks to this contribute and collaborate on projects that provide reliable answers and that meet the relevant needs. of my effort and performance. That is why it would be an honor for me to be part of your team and to have my first work experience in the sector. I am encouraged to face this new world to discover the novelty of it.
